MINITS iWitness™ Systems

The MINITS iWitness™ is an adapter system for connecting an iPhone 4s to just about any rifle scope, spotting scope, or night vision device. The system consists of military-grade components, adapters, extenders, and bushings. In conjunction with the MonoLoc™ PVS-14 series, the MINITS iWitness™ can be connected to most any tactical or spotting device.

MonoLoc™

The MonoLoc™ is a time-tested *scope adapter system* developed by Tactical Solutions, LLC. The MonoLoc™ is used by the U.S. Department of Defense, U.S. Department of Homeland Security, U.S. Customs and Border Protection, as well as many other federal, state, and local law enforcement agencies. The MINITS iWitness™ system utilizes the MonoLoc™ adapters to take adaptation to the next level—providing phenomenal *spotting*, *video capture* and *live streaming* in High Definition (1080p) using the iPhone 4s.

Bushings

Bushings provide the ability to connect the MonoLoc™ to various components without having to alter the scope or night vision device itself. The bushings provide tight adaption tolerances while protecting the eyepieces of scopes and night vision devices. This means that the system can be adapted to most any scope or device.

MINITS iWitness™ and MonoLoc™

By combining the MINITS iWitness™ All Weather (AW) mount with the MonoLoc™ adapters and bushings—you can chain together multiple components *into a powerful system*. For example:

- Daylight, Thermal and Weapon Scopes
- Spotting Scopes and Binoculars
- Close Combat Optics
- Telescopes and Microscopes
- Range Finders and more...

NOTE: If you are unable to determine the adapter, bushing or items needed to fulfill your needs, please call us at (702) 370-1633 (United States) or email rich@visionproshop.com.

Weather Proof

The MINITS iWitness™ All Weather (AW) mount is comprised of various components that are weather proof and capable of handling the strongest military and law enforcement demands. The adapters are either made of 6061 T6 Aircraft Grade Aluminum (hard anodized) or engineered composite resin. Bushings are either made of engineered composite resin or synthetic rubber. Some parts such as *springs* and *clips* are made of coated spring steel or 6061 T6 Aircraft Grade Aluminum (hard anodized). The MINITS iWitness™ system works in conjunction with the all-weather LifeProof™ case to provide a resilient and weather-proof system.

Popular Configurations

The adapter system allows you to quickly connect and adjust the MINITS iWitness™ (AW) mounts and adapters to the following popular scopes and devices, such as, but definitely *not* limited to:
